

Zehan Khan

Passionate Software Developer with 1.8 Years of experience with good foundations in web development (React, JavaScript) and a growing focus on backend technologies. Currently expanding expertise in Java and Spring Boot to build full-stack applications.

WORK EXPERIENCE

Associate Frontend Developer, HatsOff Digital, Pune

June 2024 - Present

- Building and optimizing responsive, user-friendly web pages.
- Independently managing large-scale projects, ensuring smooth functionality and performance.
- Creating reusable and scalable UI components for better maintainability.
- Fetching and displaying data dynamically using Axios and REST APIs.
- Working closely with designers, backend developers, and stakeholders to align development with project goals.
- Integrated frontend applications with backend services using API-based architecture.
- Used Postman for API testing and debugging.
- Collaborated with cross-functional teams to translate functional requirements into technical solutions.

PROJECTS

Sahyadri Hospitals - <https://sahyadrihospital.com/>

- Led frontend development in React, building responsive pages with clean code.
- Improved speed, cross-browser compatibility, and integrated APIs.
- Designed the AKVK brand campaign page to boost engagement and accessibility.
- Managed deployment and version control using cPanel with Git pull/push workflows for live updates.
